COUNTY CLERK'S REPORT.

CLERK'S OFFICE, ALLEN Co., KAS.,) January 13th, 1877.

To the tax-payers of Allen County: Believing it would be of interest to you to know how the county affairs have been conducted during the last year, and in what manner your officers have conducted the business entrusted to them, I herewith submit for your perusal a statement of their acts for the year just

During the year there has been ac-counts audited and allowed by the Board of County Commissioners, and warrants drawn by me on the County Treasurer, to the amount of \$10,821.20. This amount has been applied to the following purposes:

ALLEN COUNTY, KANSAS.

ITS ADVANTAGES

HOME FOR THE IMMIGRANT

Land at Pioneer Prices Without any of the Privations of Pioneer Life!

AMONG the many localities in Kansas which offer peculiar advantages to the Home-Seeker, Allen County, as regards Location, Soil, Water, Timber, Cheap Land, Convenience to Market, Facilities for Transportation, Towns, Settlements and Society, stands second to no other in the State, as a brief reference to the above mentioned particulars will show: mentioned particulars will show;

LOCATION.

This county is second from the East and third from the South line of the State. It is one hundred miles southeast from Topeka, seventy-five miles south from Lawrence, one hundred southwest of Kansas City and twenty-five miles west from Ft. Scott and lies mainly within the celebrated Neosho valley.

Sull.

The soil of the uplands is a black or dark red calcareous loam of great depth and inexhaustable fertility, while that of the bottoms is the black alluvial deposits usually found in such localities, and varying from four to ten feet in depth. No better soils for the successful production of all the grains, grasses, fruits and vegetables of this latitude can be found in the State.

The county is watered by the Neosho river, which flows through it from N W. to S. E., and by its tributaries in the middle and western portion and by the Marmaton and Osage in the east. Each of these streams is skirted by a belt of excellent timber and flows through fine alluvial bottoms from half a mile to a mile in width. Water for domestic pur-poses is found in springs and wells or moderate depth.

BUL-DING, FENCING AND FUEL.

One of the special advantages which this county possesses over the treeless plains of Western Kansas is found in its timber, coal and stone. The average width of timber belts is half a mile or more, and the quality is excellent, furnishing a reasonable supply for all practical purposes, as is shown by the fact that the price of good hard wood in the towns seldom exceeds \$3.50 per cord. In the eastern and less timbered portion of the county coal of fair quality is mined in quantities sufficient for domestic purposes, and will no doubt be developed as the wants of the county require.
For building and feneing stone of an
excellent quality abounds in many localities, yet so disposed as to interfere but little with the cultivation of the soil.

PRODUCTS.

As elsewhere stated this county is well suited to all the productions of this ut is especially adapted to the makes this one of the most certain and remunerative branches of husbandry

hours from Iola, the county seat.

The M. K. & T. passes through the W. corner of the county, touching at Humboldt, and affords an outlet to the mining regions of the west, and south to

Texas and the Gulf. CHEAP LANDS.

Notwithstanding the county has been settled for many years and contains a population of over 7,000, large bodies of nimproved lands are yet for sale. These lands belong to the L. L. & G. and M. K. & T. railroad companies, and are offered for sale cheaper than such lands can be bought any where in the United States where equal advantages exist. Land capable of producing twenty to twenty-five bushels of wheat or 50 to 75 bushels of corn per acre is sold at \$3.20 per acre for cash, or \$4.00 on time. Almost any year, after being reduced to cultivation, a single crop will pay the entire cost of the land.

During last season many parties in this county with less than half their land in cultivation raised corn enough when sold at 25c. a bushel to pay for the whole tract. Any one looking for a new location can not fail to appreciate this fact, especially considering the fact that these lands are surrounded by old settlements, and are convenient to railroads, towns, mills, school houses, churches and all the appliances of civilization. Land at pioneer prices, without any of the

COUNTY SEAT. Iola, the county seat of Allen county, is pleasantly located near the confluence of Elm Creek and the Neosho River, and on the L. L. & G. railroad. The Neosho at this point only needs to be improved to furnish good water power for mills and manufactories. Good pure water can be obtained at a depth of from fifteen to twenty-five feet. It has three churches, Baptist, Methodist and Presby terian, and an excellent school building. The different branches of business and the professions are well represented;
